Dear recruiters and developers,

I'm a 2nd year master candidate at the Department of Electrical and Computer Engineering, UT-Austin. My major is Software Engineering & System.

I just reviewed the job description and it seems that my knowledge and experience fit that position perfectly. I used to intern at xxx / implement a project that applied xxx, which is exactly what has been described in your web page.

It would be a great honor for me to work at xxx. I'm a big fan of your product xxx, and I really appreciate what you guys have done in the area of xxx. I believe that joining your team and participating in the development of xxx will definitely be a great journey in my life, and of course, I have the confidence to polish it and make it much better.

Thank you for your time and consideration!

Truly appreciate,
Yiran Su
